Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 July 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 34 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Beneteau (5077916).

Beneteau shows a shoe with an outsole having a frame (1), an insert (2), cushion modules (20-22), and ribs (formed by 20) as claimed.

3. Claims 33-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Gross (5367791).

Gross shows a shoe with an outsole having a frame portion (80 and 82), inserts (83 and 88), modules (226-238), ribs (84 and 86), and the modules are a hollow pod which is filled with foam and a top cover layer (200 and/or 224) as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3, 5-8, 10, 11, 13-17, 19, 21-24, and 26-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gross in view of Seydel (6266897).

Gross shows a shoe with an outsole substantially as claimed except for filling the modules with air instead of foam. Seydel teaches the obvious alternative of using air in place of foam in cushion modules (see column 17 lines 5-20). It would have been obvious to use air in place of foam as taught by Seydel in the shoe of Gross to adjust and modify the cushioning characteristics needed for a particular individual, activity, reduce the weight of the shoe, etc..

In reference to claims 7, 8, 23, and 24, Gross as modified above discloses the claimed invention except for the exact durometer of the materials. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use materials with the claims durometers, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

In reference to claims 14-15 and 29-31, official notice is taken that it is well known and conventional to use differently shaped pods/modules for traction and comfort in footwear including diamond, oval, and flat pyramid shapes, also Seydel suggests the use of different shapes for modules/pods (see figures and column 53 lines 5-10). It would have been obvious to shape the pods/modules in any known shape to provide specific traction needs, ornamentation, etc.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3728

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
